PROFESSIONAL SUMMARY

Independent game systems creator and published Conan Exiles mod author pursuing a first studio QA role. Builds and tests multiplayer RPG content, investigates unexpected behavior, and documents findings for other creators. Brings a player-focused eye for progression, usability, and game feel, backed by extensive customer support, technical troubleshooting, and team-training experience.

TECHNICAL & CREATIVE CAPABILITIES

Gameplay testing & troubleshooting: Manual playtesting, edge-case investigation, player-state checks, log review, and comparing expected vs. actual behavior.

Scripting & mod development: Conan Exiles DevKit, Unreal Blueprint visual scripting, ToT! Sudo, Pippi, Data Tables, custom item/feat IDs, status effects, and Steam Workshop publishing.

RPG systems & world design: Quest flow, branching dungeons, encounter logic, progression gates, resource economies, narrative worldbuilding, and player onboarding.

Documentation & communication: Technical guides, script flowcharts, item registries, implementation notes, and clear write-ups of observed issues and system behavior.

Visual & audio work: CG art, 3D animation, architectural visualization, photography, image/video editing, in-game audio placement, attenuation, and camera transitions.

INDEPENDENT GAME DEVELOPMENT & TESTING

Altonis: Afterfall - The Crownlands

Creator, Scripter & Server Administrator | Conan Exiles | Ongoing independent project

Published Steam Workshop mods:

- Altonis: Homepoint Crystals V2
- Altonis: Crownlands – Dungeon Master's Spoils V2

Featured mod showcase: Homepoint Crystals V2 – Shatter System video (YouTube)

- **Game systems:** Build and maintain a custom multiplayer RPG world with quests, branching dungeons, merchants, banking, travel, and progression, connected through character tags, conditional logic, timers, and item triggers.
- **State testing:** Tested death-prevention behavior across quick relogs and full character spawns, distinguishing a persistent status effect from a newly triggered script. Confirmed unconfigured character-sheet rolls return unmodified results, not zero.
- **Audio & camera testing:** Compared four sound-node types and documented who hears each, where playback occurs, and which controls take effect. Identified the camera-position setup needed to prevent awkward transitions after fade-to-black.
- **Mod implementation:** Create custom items, feats, consumables, and admin tools with Blueprint and Data Tables. Develop fragment items that combine into progression keys; maintain item IDs, combine rules, and usage descriptions.
- **Server troubleshooting:** Maintain separate test and main servers, investigate mod/load-order and startup issues, and work with hosting support to narrow causes and validate recovery.

PROFESSIONAL EXPERIENCE

Travel Sales & Support Agent **2024 - Present**

DS NST | Travel Call Center

- Support clients by phone and book vacation experiences worldwide, helping them compare options and understand booking details.
- Rank among the team's top agents in booking performance, building a loyal base of high-value clients who request continued one-on-one service.

Fine Dining Server **Oct 2024 - Jun 2026**

Sugo Italian Steakhouse, Wilmington, NC

- Provided attentive fine-dining service, tailored menu and wine recommendations, and careful handling of dietary needs.
- Built guest relationships through personalized communication and consistent attention to service details.

Server, Bartender & Trainer **May 2019 - Sep 2024**

Tommies Tavern and Tap, Princeton, NJ

- Served guests and prepared beverages in a fast-paced restaurant while keeping orders and payments accurate.
- Trained new team members and maintained a professional, organized service environment.

Lead Server **Aug 2015 - May 2019**

Lan Asian Fusion, Princeton, NJ

- Partnered with the owner to train new servers in upselling and service standards.
- Managed multiple tables, opening/closing duties, cash handling, and inventory; supported expo and takeout orders.

Sales Lead & Trainer **Jun 2016 - Jul 2018**

MarketSource, Princeton, NJ

- Exceeded sales goals, trained new team members, and led meetings to share product knowledge and sales practices.
- Provided technical support to wireless customers, explaining options and resolving issues.
